

Strategic Values Series - The Value of Dependability

Discussion - Do you think that Dependability is an important value to have and why?

“Dependability

From Wikipedia, the free encyclopedia

*In **systems engineering**, dependability is a measure of a system's availability, reliability, maintainability, and in some cases, other characteristics such as durability, safety and security.^[1] In **real-time computing**, dependability is the ability to provide services that can be trusted within a time-period.^[2] The service guarantees must hold even when the system is subject to attacks or natural failures.”*

Availability and reliability produce trust and create a place of security.

1. Dependability is One of God's Values

God's Availability

Jeremiah 29:12-14

Ephesians 2:17-19

Psalms 32

God's Reliability
